

[Original repo](#)

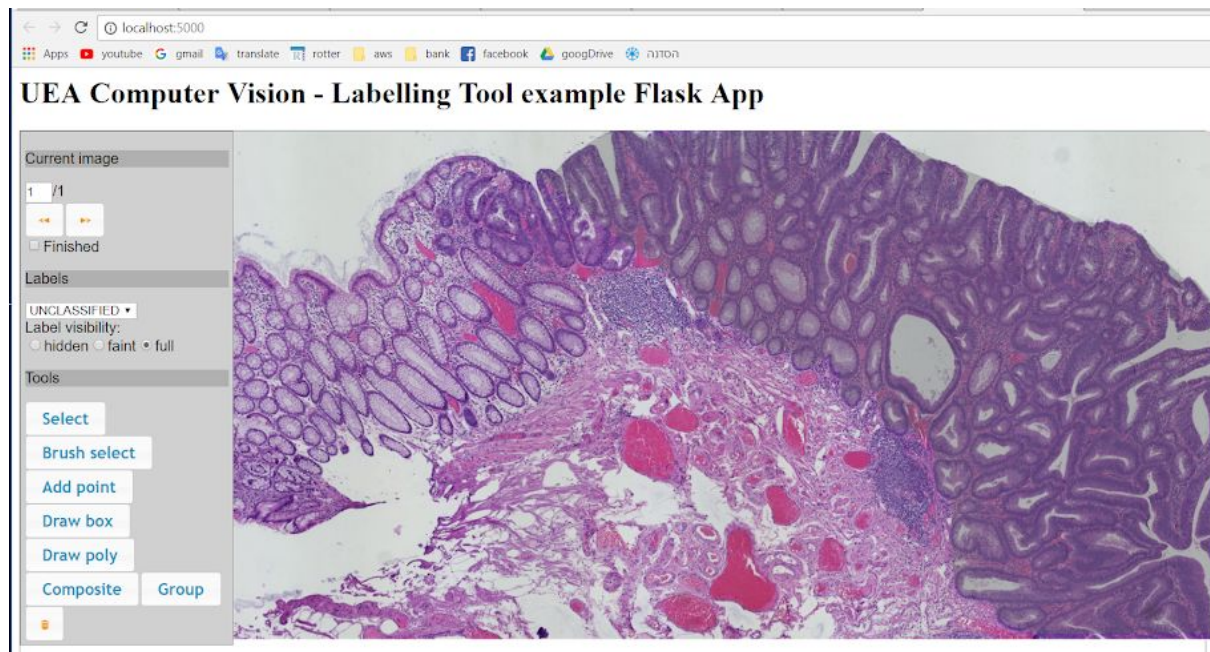

installation:

```
install anaconda
open anaconda prompt
conda create -n tag_venv python=2.7.14
conda activate tag_venv
pip install -r annotation_tool_requirements.txt
git clone <OUR_GIT>
```

running:

```
open anaconda prompt
conda activate tag_venv
python annotation_script.py --image_dir <PATH_TO_IMAGE_DIR>
NOTE: only the path to the image directory, NOT including the image file-name itself.
```

How to use:

- grab image using right-click (hold down)
- Use 'draw poly' tool option
- Left click to add polygon corner
- Use scroll to zoom in / out
- Finish tag by right-click
